ABOUT

- ▶ Based on the style by Cameron Bracken
- ▶ Serif
- ▶ Nicer looking than most Beamer Themes
- ▶ Has a fancy background

REQUIREMENTS

- ▶ Requires:
 - ▶ `ifdraft`
 - ▶ `tikz` (optional, used for background only)
 - ▶ `palatino`

USAGE

Use the style like any other beamer theme. Simply place it in a TeX path and use:

```
usetheme[option,option2=value]SmartSerif
```

Options are listed in subsequent pages of this manual.

COLOUR OPTIONS

- ▶ **bannerbg=colour** — Set the banner background
- ▶ **bannerfg=colour** — Set the banner foreground
- ▶ **bannerline=colour** — Set the colour of the line at the bottom of the banner
- ▶ **curvecolour=colour** — Set the colour of the Koch curve in the background
- ▶ **infolabcolours** — Uses infolab colour schemes, and turns off the curve (use `forcecurve` to turn it back on again)

DISPLAY OPTIONS

- ▶ **nocurve** — Disable the background curve
- ▶ **forcecurve** — Turn the curve on when disabled by the `infolabcolours` option
- ▶ **num** — Show slide numbers in the footer
